Unit 1
A. The Hospital Team

It is essential for you to know the people who you are going to work with in the hospital. You must know the different roles played by these people as well. They could be doctors, nurses, medical professionals, and staff. Let’s get to know them and what they do.

<table>
<thead>
<tr>
<th>Porter</th>
<th>Receptionist</th>
<th>Paramedic</th>
<th>Scrub Nurse</th>
<th>Pharmacist</th>
</tr>
</thead>
<tbody>
<tr>
<td>Radiologist</td>
<td>Lab Technician</td>
<td>Charge Nurse</td>
<td>Cardiologist</td>
<td>Midwife</td>
</tr>
<tr>
<td>Pediatrician</td>
<td>Consultant</td>
<td>Physiotherapist</td>
<td>Anesthetist</td>
<td>Surgeon</td>
</tr>
</tbody>
</table>

Exercise 1.1 Choose the correct word from the box to complete the sentences.

1. A ____________ is a doctor who treats children
2. A ____________ is a medical professional who attends births and delivers babies.
3. A ____________ is a doctor who specializes in illnesses of the heart and blood vessels.
4. A ____________ is a staff who moves patients, equipment, furniture, etc. around the hospital.
5. A ____________ is a medical professional who takes x-rays and other images.
6. A ____________ is a nurse who supports surgeons in the operating room.
7. A ____________ is a nurse who prepares medicines to give to medical staff or patients.
8. A ____________ is a medical professional who responds to emergencies and gives first aid.
9. A ____________ is a doctor who performs surgical operations.
10. A ____________ is a medical professional who examines samples and tissues under a microscope.
11. A ____________ is a nurse who supervises staff nurses in a ward.
12. A ____________ is a staff who assists people with appointments and directions.
13. A ____________ is a nurse who administers drugs to patients to prevent pain during surgery.
14. A ____________ is a doctor who gives expert opinion to other doctors and surgeons.
15. A ____________ is a medical professional who helps patients with physical difficulties resulting from illness, injury, disability.
Introducing Yourself and the Hospital Staff

When it’s your first day at work or if you are moved from one department or ward to another, you must make sure that you can introduce yourself properly to your new colleagues. In turn, you should be able to introduce yourself and your colleagues to the patient. Here are sample conversations:

Introducing yourself to the patient
Parn: Hello! I’m Parn, a Staff Nurse here at Naresuan University Hospital. May I know your name?
Moo: Hi! My name is Moo. How are you?
Parn: I’m good, thanks for asking. I’d like you to meet Jam, she is our nursing assistant.
Moo: Nice to meet you Jam.
Jam: Nice to meet you too. If you need anything, just let me know.
Parn: Thanks Jam. Could you please get some water for Moo.
Jam: Sure, I’ll be back in a minute.

Introducing your colleagues
Parn: Hi Bam. Have you met the Ward Charge Nurse?
Bam: No, we haven’t met yet.
Parn: May I introduce you to Sister Tam.
Bam: Good morning, my name is Bam. How do you do?
Tam: I’m doing well. How about you?
Bam: I’m great! It’s a pleasure to meet you.
Tam: The pleasure is mine.

When you are to meet people for the first time, you have to use formal or informal words to address them. Typically, if you are meeting someone new from work, especially if they are someone older or more senior than you, you have to use formal words. If you are meeting new friends or colleagues at the same level as you are then you can use informal words.

<table>
<thead>
<tr>
<th>Introduction</th>
<th>Response</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Informal</strong></td>

<td>No, we haven’t met yet.</td>
</tr>
<tr>
<td>It’s a pleasure to meet you.</td>
<td>Yes, we have met yesterday / last week.</td>
</tr>
<tr>
<td></td>
<td>I’m very pleased to meet you too.</td>
</tr>
<tr>
<td></td>
<td>The pleasure is mine.</td>
</tr>
</tbody>
</table>

Speaking Activity

Form a group of three and practice the introductions and responses. Prepare to present your introductions in front of the class.
Different countries, Nationalities and Languages

It is important for nurses to know the different countries, nationalities and languages of their patients.

Exercise 1.2 Write the nationality and language spoken of the people from these countries.

<table>
<thead>
<tr>

B. In and Around the Hospital

The names of the wards can be formed by adding a suffix from the departments and used as an adjective.

e.g. surgery becomes the surgical ward
      medicine becomes the medical ward
      gynecology becomes the gynecological ward

*for obstetrics we use the labor ward

Exercise 1.3 Make an adjective from these words by removing the letters in bold and adding a suffix.

1. Neurology __________________  5. Ophthalology  __________________
2. Cardiology __________________ 6. Neonate __________________
3. Gastrology __________________ 7. Pharmacology __________________
4. Dermatology __________________ 8. Urology __________________

Ask your partner the following questions:

1. Where can a mother go to visit her premature baby?
2. Where do you ring to order a patient’s medications?
3. Where can I find a doctor to look at my moles?
4. Where do patients usually go if they have a heart attack?
5. Where do patients go when they have an infection in their bladder?

Look at the prepositions used in the following examples:

A pediatric nurse works in the nursery in the children’s ward.

My friend works in the Operating Theatre on the 6th floor.

The Surgical Ward is next to the Orthopedic Ward on the same floor.

We use different expressions depending on the situation:

We go to a ward or department.

We work in a ward, but we work at the hospital.

We take/send a patient to a department but he is in the ward, hospital, or theatre.
C. Hospital Admissions

What is the Standard Admission Procedure where you work? With a partner, put the following points into a possible sequence. (1-9)

___ a. Tell the patient what is going to happen to him/her in the next 12-24 hours.
___ b. Co-ordinate between the patient, the doctors and other health care workers.
___ c. Put on the patient’s name band and signs necessary on the bed (e.g. nil orally or fasting)
___ d. Inform the doctor in charge of the patient’s arrival.
___ e. Welcome the patient in a calm, friendly manner.
___ f. Introduce yourself and the other patient (s) in the room. Introduce other staff and the Ward Charge Nurse where possible.
___ g. Complete the admission form and appropriate charts.
___ h. Show the patient where to find the bathroom, the Nurse’s station, the Day Room (Sitting Room).
___ i. Demonstrate the handset with the overhead light and the call bell (or buzzer) and the patient how to use the remote – if a TV is provided.

Reading

On Monday, Mark is admitted to hospital and arrives in the Surgical Ward with Julie. They meet the Charge Sister and Sister Joanna, who takes them to a room. Mary, the Ward Help, is in the room cleaning the bedside tables. There are 2 beds in the room but both are empty.

Sister Pat: This is your room, Mark – number 612. You will be on your own for a couple of days so you can choose the bed near the window or this one near the bathroom. Hello Mary, this is Mark Andrews and his wife Julie.
Mary: Good morning, Mr. and Mrs. Andrews. Can I get you a bottle of water and a glass?
Sister Pat: Thank you Mary, but mark is having more tests today and can’t have anything to eat or drink until later. Mary is a wonderful help and will help us to look after you, Mark.
Mark: Thank you. I’d like to have the bed near the window if that’s all right.
Sister Pat: Yes, of course. I’ll leave you to change into your pyjamas and hop into bed and then I’ll come back in a few minutes to ask you a few questions. You can put your clothes in the cupboard on the left, but it isn’t very big so it’s probably a good idea to take the suitcase home with you, Mrs. Andrews. Mark, you can put the things you need in the cupboard near the bed.
Mark: Yes, thank you. Jules will take the case with her when she goes – you’ve got the car, love, so that’s no problem, is it? Can my wife stay here this morning, Sister?
Sister Pat: Yes, that’s fine. I’ll come back to speak to you both very soon. This is the handset. if you need anything, just call. This button is the buzzer and this one is to cancel your call – the light over the door turns off – this one is for the overhead light... OK?

Exercise 1.4 Read the dialogue to answer the following questions:
1. Who is Mary?
2. How many patients are in the room with Mark?
3. Does he have a choice of beds? Which one does he choose?
4. What is Julie taking home?
5. Is Mark fasting?

Speaking Activity
In groups of 3, practice the dialogue. Discuss the expressions in bold and how you can say them differently.
Unit 2

A. Accidents and Emergencies

As health care professionals, we have to know the terms used to get information in a patient’s record.

Exercise 2.1 Complete the sentences with the words below.

<table>
<thead>
<tr>
<th>a triage nurse</th>
<th>treatment</th>
<th>an initial assessment</th>
<th>cubicle</th>
</tr>
</thead>
<tbody>
<tr>
<td>life-threatening</td>
<td>a priority</td>
<td>waiting room</td>
<td>registration</td>
</tr>
</tbody>
</table>

1. Take a seat in the ____________________.
2. The first nurse you meet will be a specialist called ____________________.
3. This nurse will make ____________________ of your problem.
4. This helps decide who is ____________________.
5. A patient with a ____________________ condition will see a doctor immediately.
6. A nurse will get personal details from you and fill in a hospital ____________________ form.
7. When there is a free ____________________, a doctor will see you.
8. The doctor will decide on the ____________________.

Patient Record

</table>

Exercise 2.2 Find words and abbreviations in the patient record with these meanings.

1. job
2. bad reactions, e.g. certain medications
3. family doctor
4. closest relative
5. the amount of something you eat, drink, etc. regularly
6. date of birth
7. male / female
8. pass illnesses and injuries
9. married / single /divorced /widowed
10. not applicable (not a question for this patient)
11. in each (day, week, etc.)
12. number
Giving Instructions

We need to be able to give instructions clearly to our patients or to other health care professionals to be able to provide the best possible care.

To tell somebody what to do, you can use the Imperative. Start the sentence with a verb without a subject.

- **Check** for signs of circulation
- **Apply** the pads to his chest

To tell what not to do, add *Don’t* before the imperative

- **Don’t** remove burnt clothing

To emphasize that is important, you can use *Make sure* ...

- **Make sure** the wound is clean.
- **Make sure** you don’t touch his body.

When asking for instructions, you can use the Present Simple, have to, shall and should.

- What **do I do** now?
- Do I **have to** immobilize his leg?
- **Shall I** take off the dressing now?
- What dosage **should I** give him?

Exercise 2.3 Match the beginnings and endings of the sentence.

1. Check that a. I count up to between breaths?
2. Make sure you b. I give her?
3. What do c. have to apply the pads?
4. Don’t let d. the patient is breathing.
5. Should I e. the patient try to stand up
6. Shall I bandage f. put the burnt area under running water?
7. Don’t g. the patient’s pulse
8. What dosage shall h. tie the bandage too tight!
9. Take i. the wound now?
10. Where do I j. use a sterile needle
Speaking Activity

Student A

1. You are a parent. Five minutes ago a poisonous snake bit your child. You phone an emergency helpline. Explain the situation to the helpline nurse, then listen and use these notes to find out what to do. Note down the instructions that you are given.

Example: What shall I do with ..........?
   Should I put it on ice? Should I ..........?
   • wound – ice? bandage?
   • child thirsty - milk OK?
   • walk around?
   • doctor?

2. A man you work with has spilt pesticide on his face, eyes and mouth. Phone the emergency helpline for instructions. Explain the situation to the helpline nurse, then listen and use these notes to find out what to do. Note down the instructions that you are given.

   • difficulty breathing – walk around?
   • drink?
   • mouth? eyes? skin?

Student B

1. You are a nurse working on a telephone helpline. Listen to your caller explain the emergency, then use these notes to tell the caller what to do to answer any questions.

Example: Wash the wound with soap and water. Don’t practice ...
   • wound – wash ✓ (soap and water), ice X, bandage ✓ (not too tight)
   • immobilize the leg ✓ (lower than the heart)
   • stand up, move X
   • food, drink X
   • hospital ✓

2. You are a nurse working on a telephone helpline. Listen to your caller explain the emergency, then use these notes to tell the caller what to do and to answer any questions.

Example: Make sure he gets fresh air!
   Open windows and doors and ...
   • fresh air ✓✓ (windows /doors ✓, carry if necessary ✓, walk X)
   • mouth – wash out ✓ (water)
   • milk ✓ (alcohol X)
   • skin – remove clothes if covered in pesticide ✓, wash ✓ (running water, soap)
   • eyes – wash ✓ (running water, 15 minutes +, chemicals x)
   • touch pesticides XX (gloves ✓✓)
B. Admissions by Referral

Polite Phrases

When talking to patients and staff, it is important to use polite words and tone. We have to remember that we are the people who patients face every day and should be courteous and kind as possible. Even though some patients can be difficult, we should still compose ourselves and treat them nicely as we would like to be treated the same.

Nurse: I’ve forgotten your name.
Patient: It’s Mrs. Stein.
Nurse: Of course, Mrs. Stein. Give me your letter of referral.
Patient: Here it is.
Nurse: Thanks. So, Mrs. Stein, you’ve come in for removal of varicose veins?
Patient: Yes. The operation is this afternoon.
Nurse: Confirm one or two things. First, are you on any medications?
Patient: Yes, I take Venlafaxine.
Nurse: What for?
Patient: I take it for depression.
Nurse: OK. Now, tell me about your lifestyle. Report any alcohol or drug problems you have.
Patient: None, I don’t drink and I don’t take drugs.
Nurse: Also, tell me if you have any contact with HIV in the past six months.
Patient: I haven’t had any contact with HIV, no.
Nurse: Fine, and who’s paying for your treatment?
Patient: I’m covered by medical insurance.
Nurse: Great, and lastly, you must take off your make up and rings.

Exercise 2.4 Replace each underlined phrase in the dialogue with an alternative polite phrase from the list.

___ would you mind if I ask you to
___ it’s important to know about
___ can you tell me how you are
___ could you tell me if you take
___ I’m sorry, I can’t remember
___ I need to know if you have
___ can you let me have
___ I’d like to check
___ may I ask why
___ I have to ask

Getting Verbal Consent

A 64-year-old woman with MS is admitted. The doctor thinks she should be placed on a feeding tube. In the morning the patient is confused. A nurse talks to her about the feeding tube and she consents. However, later in the day when the tube is going to be placed, the patient says she doesn’t want it in. The following morning, the patient is vague and the nurse tries once more and again the patient consents to the procedure.

Is the patient able to decide? Should the nurse place the feeding tube or not?

Work in pairs. Discuss these questions
1. When is it necessary to get a patient’s verbal ‘informed consent’?
2. When should a patient sign a consent form and when is it not necessary?
3. Listening to a heartbeat through a stethoscope is a medical procedure – does this need the patient’s informed consent.
C. Outpatients

In some countries, outpatients don’t make appointments; they just turn up. Discuss if a ‘first come, first served’ system has any advantages at all compared to an ‘appointments only’ system.

Exercise 2.5 Use this words in the box to identify the kinds of appointments described in sentences 1-12.

<table>
<thead>
<tr>
<th>cancelled</th>
<th>initial</th>
<th>previous</th>
<th>confirmed</th>
</tr>
</thead>
<tbody>
<tr>
<td>missed</td>
<td>routine</td>
<td>delayed</td>
<td>out-of-hours</td>
</tr>
<tr>
<td>double-booked</td>
<td>postponed</td>
<td>vacant</td>
<td>follow-up</td>
</tr>
</tbody>
</table>

___________ 1. An outpatient’s appointment after an operation
___________ 2. When two people are given the same appointment time
___________ 3. When a patient tells you they will definitely keep their appointment
___________ 4. An appointment for eight o’clock in the evening
___________ 5. When the consultant is running late
___________ 6. The first appointment
___________ 7. An appointment made for Monday, but changed to Wednesday
___________ 8. When a patient doesn’t turn up
___________ 9. An appointment slot that is available
___________10. A regular appointment
___________11. Not this appointment, but the one before
___________12. All the appointments after this one.

Group Activity

Deciding who should have an appointment

Work in groups of 4. You work in a hospital x-ray department. The next four weeks are almost fully booked, but there is one vacant slot today. Four patients want the vacancy and you must decide who gets it. Read the information that will be given to you and talk about it with your group.

Patient 1
On the telephone is a woman. She wants to make an appointment for her 12-year-old child. Mother and daughter have missed the last two appointments; the first because they decided to go to the cinema instead, the second because they forgot.

Patient 2
In reception is a patient who is a heavy smoker. She has a bad cough, but has not stopped smoking despite doctor’s warnings. An x-ray was taken last month, but the hospital has lost her records.

Patient 3
In reception is a patient who is worried about a slight intermittent pain in his chest. He already has an appointment, but it is in four weeks’ time and he wants an earlier one. He has already been waiting for two hours.

Patient 4
On the telephone is a young man who is not ill, but needs a chest x-ray in order to start a new job. He says his new employers cannot wait and he must have the x-ray done now or lose the job.
Unit 3

A. Signs and Symptoms

As a healthcare worker, it is vital to be able to determine signs and symptoms of the patients illness or disease.

Signs are what you can observe, see or feel for yourself.

The nurse can observe changes in recorded observations – blood pressure, temperature, pulse or respiration.

- a bruise or bruising – that is hematoma
- a rash, which is an area of red lumps or pimples on the skin, which can be a type of erythema or urticaria (allergy rash)
- changes in the color of the skin: anemic -looking - white or pale
cyanosis – blue color
jaundice – yellow color
inflammation – redness
- signs of weight loss (losing weight) or weight gain (putting on weight)
- swelling or puffiness – extra fluid in the tissues under the skin (edema)
- cuts, wounds or lacerations: breaks in the skin

Symptoms are things that the patient feels and tells the nurse about.

The patient may say that:

- he feels like vomiting – or he feels sick in the stomach (nauseated)
- he has pain
- he cannot sleep (suffers from insomnia)
- he had diarrhea – frequent, loose stools/bowel actions
- he feels dizzy or giddy (vertigo)
- he is very thirsty or dehydrated
- he feels numbness or tingling (‘pins and needles’) – loss of sensation or changed sensation

Signs or Symptoms
Palpations are a ___________ when the patient tells you he can feel his heart racing or thumping. It could also show as a __________ on an ECG.

Shortness of Breath may be visible or only felt by the patient ‘on exertion’ (SOB-OE)

Exercise 3.1 Work with a partner and decide if the following words are signs or symptoms.

1. an irregular pulse ____________ 6. shallow respirations ____________
2. stomach ache ____________ 7. dyspnea ____________
3. thirst ____________ 8. pallor ____________
4. hunger ____________ 9. lacerations ____________
5. extreme weight loss ____________ 10. headache ____________
Question forms
When we want to get information from the patient or from our colleagues, we have to be able to make good questions. Here are ways on how you can ask questions:

1. We change the order to form a question with **be**, with **tenses that are formed with be and have**, and with **modal verbs** such as **can, will, should, etc.** Switch the subject and the verb.
   
   Are you all right? (NOT: You are all right?)
   
   What is she doing?
   
   Where have they put the wheelchair?
   
   Can you move your toes?

2. We use the verb **do** to make questions with the Present Simple and Past Simple
   
   What side effects does this drug have?
   
   Did you take your medication last night?
   
   Do you smoke or drink alcohol?

3. If what, who, etc. asks about the subject of the verb, do is **not** necessary
   
   What happened? (NOT: What did happen?)
   
   Who said that? (NOT: Who did say that?)

4. We often use question tags to check information, to express surprise, to be friendly etc.
   
   This is your first time on this ward, isn’t it?
   
   You don’t eat meat, do you?

5. We sometimes leave out the verb, if it is easily understood.
   
   Any pain? = Do you have any pain?
   
   Comfortable? = Are you comfortable?

Exercise 3.2 Match the beginnings of the questions with the endings.

1. OK, a. it hurt?
2. What b. Mrs. Hales?
3. Where does c. are you?
4. What about d. broken?
5. Let’s have a look – swollen e. happened to you?
6. You’ve had an x-ray f. haven’t you?
7. Anything g. your shoulder?
8. You aren’t on any other medication, h. isn’t it?

Write questions to go with these answers.

Nurse: _____________________________
Patient: Not bad, thanks – a bit sore.

Nurse: _____________________________
Patient: I fell off my bike.

Nurse: _____________________________
Patient: Here, around my wrist.

Nurse: _____________________________
Patient: Yes, I can, slowly.

Nurse: _____________________________
Patient: Yes, very! I’ve also got a cut on my leg – look.

Nurse: _____________________________
Patient: Yes, it is deep. Will I need stitches?

Nurse: _____________________________
Patient: No, never – and I don’t want any!

Nurse: _____________________________
Patient: No. I haven’t seen him yet.
B. Monitoring the Patient

Taking ‘OBs’ (Patient Observations)

Write down the full meaning of these abbreviations.

BP ___________________ T ______________ P __________ R __________________

What measurements are considered within normal limits for an adult’s BP, T, P, R?

BP ___________________ T ______________ P __________ R __________________

Taking vital signs

Exercise 3.3 Put the words in order to make sentences. Which vital signs is the nurse taking in each case?

___ 1. tongue / pop / your / under / just / this. _________________________________________
___ 2. roll / your / can / you / sleeve? ______________________________________________
___ 3. cold / a / feel / bit / your / may / on / chest. / this __________________________________
___ 4. and / out / in / just / normally / breathe. _________________________________________
___ 5. relax / me / for / your / arm. _________________________________________________
___ 6. shirt / you undo / please? / your/ for me, / could ___________________________________

Describing Readings

Exercise 3.4 Complete the sentences with the words below, and match each one to a graph.

<table>
<thead>
<tr>
<th>‘s up</th>
<th>rising</th>
<th>fell</th>
<th>stable</th>
<th>up and down</th>
<th>went up</th>
<th>varies</th>
<th>back to</th>
</tr>
</thead>
</table>

___ 1. His temperature was _______________ all night, but now it’s a _______________ at 37.5.
___ 2. Her heart rate _______________ at 20 bpm, but now it’s _______________ again.
___ 3. His blood pressure _______________ from 120/80 to 160/100.
___ 4. Her pulse rate was extremely low, but now it _______________ to 70.
___ 5. His respiratory rate _______________ between 10 and 25 bpm.
___ 6. He was running a fever, but his temperature’s _______________ normal now.

[Graphs a, b, c, d, e, f]
The Passive Form

- Passive verb forms are very common in medical English. We use Passive verbs to say what is done to people and things.
  
  The patient’s progress is monitored every hour.
  Mr. West was treated for multiple injuries

- Often, you can choose whether to use an Active form or a Passive form. Compare these sentences:
  
  Paramedics treated the man for hypothermia. (_____________)
  The man was treated for hypothermia. (_____________)

- The Passive form focuses on the action, not on the person or thing that does the action. If you want to say who does the action use by.
  
  The man was treated for hypothermia by paramedics.

Exercise 3.5

Underline the correct form of the verb in italics.

Mrs. Ramone admitted/was admitted ¹ to hospital for an operation. She didn’t give/wasn’t given ² food for eight hours. She brought/was brought ³ to theatre at sixteen hundred hours.

She was prepared/prepared ⁴ for theatre. The nurse shaved/shaved ⁵ the area which was going to cut/be cut ⁶, and Mrs. Ramone put on/was put on ⁷ a theatre gown. Her dentures removed/were removed ⁸, and her wedding ring taped to her wrist.

Exercise 3.6

Kim Deva was woken up one night by severe abdominal pains. Read the notes, and write sentences to describe his experience using the Passive. You can say who did each action if you want to.

  example: admit/hospital = He was admitted to hospital.

1. give/general anesthetic

2. perform/appendectomy

3. insert/stitches/wound

4. prescribe/painkillers

5. discharge from hospital
C. Medication

Types and Forms of Medication

Exercise 3.7 Match the pictures with the forms of medications:
1. syringe _______ 6. suppository _______
2. inhaler _______ 7. adhesive patch _______
3. ointment _______ 8. vial _______
4. capsules _______ 9. dropper _______
5. IV drip _______ 10. ampoule _______

Exercise 3.8 Complete each sentence with a type of medication.

<table>
<thead>
<tr>
<th>a painkiller</th>
<th>a sedative</th>
<th>an anti-inflammatory</th>
<th>an inoculation</th>
</tr>
</thead>
<tbody>
<tr>
<td>an antibiotic</td>
<td>an antihistamine</td>
<td>a stimulant</td>
<td>an antidepressant</td>
</tr>
<tr>
<td>a laxative</td>
<td>a supplement</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1. _________________________ kills bacteria and other germs.
2. _________________________ protects you against infectious diseases.
3. _________________________ relieves pain.
4. _________________________ reduces swelling.
5. _________________________ encourages bowel movement.
6. _________________________ provides a substance that the body lacks.
7. _________________________ treats allergies
8. _________________________ increases activity in the body.
9. _________________________ reduces feelings of extreme sadness.
10. _________________________ makes you relaxed and sleepy.

Medication dosage can be measured differently:

for liquids: teaspoon (tsp), tablespoon (tbsp.), millilitres (mL), litres (L)  1 L = ____ mL   1 tbsp = ____ tsp.
for solids: milligrams (mg), grams (g), micrograms (mcg)  1 g = ____ mg   1 mg = ____ mcg
Speaking Activity.
Work in pairs. You are going to exchange details about patients’ medications.

**Student A**
Ask Student B questions to complete this information about patient’s medication.

<table>

Unit 4

A. Mental Health Nursing

Exercise 4.1 Match each word with its definition.

a. posture  ____ 1. not sure where you are
b. unemotional  ____ 2. not wanting to talk to people
c. hallucinations  ____ 3. not logical, not making sense
d. maniac  ____ 4. behaving on an abnormally excited way
e. paranoia  ____ 5. not showing your feelings
f. disoriented  ____ 6. a way of standing or sitting
g. uncommunicative  ____ 7. feelings of extreme uncontrollable sadness
h. delusions  ____ 8. strange and false ideas that somebody believes are true
i. irrational  ____ 9. occasions when you imagine you see things that are not really there
j. depression  ____ 10. the false belief that somebody is trying to harm you, or that they are somebody very important

Present Perfect v Past Simple

We use the Present Perfect

• to talk about past actions in an unfinished period of time, for example ‘in my whole life’ or ‘today’
  I’ve never done this before.
  Have you seen Ana this morning?
• when past actions has a result in the present
  He’s had his medication and is feeling sleepy.
• when we give news of recent, finished events
  The psychiatrist has just spoken to the patient’s family
• when we say how much we have completed, how many times we have done something, etc.
  I have told him six times to take his medication.
• with yet, to talk to about whether or not tasks have been completed.
  I’ve taken Mr. Pool’s temperature, but I haven’t checked his blood pressure yet.
• with for and since to talk about when a present situation started
  I’ve worked at this hospital for six months.

We use the Past Simple, not the Present Perfect

• when we talk about a finished time in the past, especially with time expressions such as ago, last week, in 2016.
  I graduated from college two years ago.
  I finished my hospital training in 2016.
  The patient went to the hospital last week.
Exercise 4.2 Complete each sentence using one of the verbs below. Use the Present Perfect where possible. In other sentences, use the Past Simple.

<table>
<thead>
<tr>
<th>attend</th>
<th>go</th>
<th>see</th>
<th>study</th>
<th>be</th>
<th>finish</th>
</tr>
</thead>
<tbody>
<tr>
<td>have</td>
<td>start</td>
<td>write</td>
<td>finish</td>
<td>reply</td>
<td></td>
</tr>
</tbody>
</table>

1. We __________________ the assessment. You’ll get the report tomorrow.
2. The doctor __________________ the patient three times today.
3. I __________________ working here a year ago.
4. Mrs. Linton is no longer in hospital. She __________________ home.
5. I __________________ three letters to the consultant, but he __________________ yet.
6. I __________________ until 11 o'clock last night.
7. The patient __________________ the clinic since January.
8. The patient __________________ in hospital for a week now.
9. __________________ you ever __________________ a general anesthetic?

Exercise 4.3 Paula is a nursing assistant. She is finishing her shift and Jack is starting his. Jack is checking the list of things to do. Look at the list and write five sentences about what Paula has done and hasn’t done yet.

- change patients’ dressings
- Mrs. Eriksson - blood pressure ✓
- Mr. Sissoko - temperature ✓
- clean up spillage x
- Mrs. Wong - urine specimen x

Write the past participle of these verbs:
be  ___________  
give  ___________  
watch  ___________  
work  ___________  
forget  ___________  
talk  ___________  
take  ___________  
try  ___________  

Speaking Activity
Write questions using Have you ever .... and the verbs above to find out about your partner’s experience as a student nurse.
Example: Have you ever been late for duty?
Work in pairs and ask your questions. Each time you receive the answer yes to your question, ask another question using Past Simple to get more information.
A: Have you ever been late for duty?
B: Yes, I have.
A: Really how many times. / When was that?
B: Just once. / It was yesterday.
Reading

Schizophrenia – the facts

Every year, 1.5 million people worldwide are diagnosed with schizophrenia. It is a mental illness which has periods called ‘psychotic episodes’. During a psychotic episode, a sufferer shows disturbing changes in behavior. They may seem very cold and unemotional, using few facial expressions, and say strange things in a slow, flat voice. They may lose all interest in life and spend days doing nothing at all, not even washing or eating. These distressing symptoms are shocking for family members who, of course, remember what the sufferer was like before the onset of the illness.

During a psychotic episode, there may be hallucinations. Hearing voices that other people do not hear is the most common type of hallucination. The voices give orders and carry on conversations. Sometimes the voices swear and make threats.

Someone with schizophrenia may have delusions, believing for example that they are a famous, historically important person, or that people on television send them special messages.

People with schizophrenia may not think logically. They are isolated because conversation with them is very difficult, so they have no one to communicate with.

It is relatively common for schizophrenia sufferers to commit suicide – 10 per cent of people with schizophrenia (especially younger adult males) kill themselves. Violence and threats against others, on the other hand, are not symptoms of the illness.

There is medication that can reduce the symptoms, but it often has bad side effects, and some sufferers discontinue treatment because of this. Although many sufferers can continue to lead a relatively normal life, it has been estimated that no more than one in five individuals recovers completely, and most will require long-term treatment.

We do not yet know the cause of schizophrenia. Researchers have looked at links with genes, with brain development, with infections before birth, and with traumatic life events.

Exercise 4.4 Read the article about schizophrenia and decide if these sentences are true or false.

_____ 1. There are 1.5 million sufferers of schizophrenia.
_____ 2. A psychotic episode is a symptom of schizophrenia.
_____ 3. People with schizophrenia are usually not violent and dangerous.
_____ 4. Suicide is not connected with schizophrenia.
_____ 5. We understand what causes schizophrenia.

Join the word combinations without looking at the text. Choose some of the combinations to learn.

1. changes a. relatively normal life
2. facial b. completely
3. the onset of c. side effects
4. think d. suicide
5. commit e. expressions
6. reduce the f. treatment
7. have bad g. the illness
8. lead a h. in behavior
9. recover i. logically
10. long-term j. symptoms
B. Neurology

Exercise 4.5 Read about the Glasgow coma scale and complete the text with the adjectives and adverbs below. The order of responses has been mixed, read each section and number the responses in correct order. (eye response 1–4, verbal response 1–5, motor response 1–6)

- appropriately
- bent
- coherently
- deeply
- incomprehensible
- random
- spontaneously
- verbal

The **Glasgow coma scale** is used for measuring how ________ unconscious a patient is, in order to assess the extent of brain damage. Eye response, verbal response, and motor response are tested. For each of these tests, the patient receives a score, with the minimum being 1 for no response. The total for the three tests gives the patient’s GCS score.

**Eye response**
- a. eyes opening to ________ command
- b. no eye opening
- c. eyes opening in response to pain
- d. eyes opening ________

**Verbal response**
- a. confused (the patient responds to questions but there is ________), some confusion)
- b. none
- c. inappropriate words (________ speech, but no conversational exchange)
- d. ________ sounds (moaning, but no words)
- e. oriented (the patient responds ________ to simple questions)

**Motor response**
- a. withdrawal (pulls arm away) from pain
- b. extension (arms straight by sides) in response to pain
- c. no motor response
- d. obeys commands (the patient does simple things as asked)
- e. localizing pain (moves hands towards pain)
- f. flexion (arms ________ up to chin) to pain

Case study – a head injury

Exercise 4.6 You are going to read the case study of a young female patient who received brain injuries four months ago. Tick which injuries Katie sustained.

1. a fractured skull  
2. a broken arm  
3. chest injuries  
4. a broken leg  
5. internal injuries  

Katie Martin is a nine-year-old female who was in a car crash. At the scene here Glasgow coma scale was 3. She was intubated and transported by helicopter to hospital. She was taken to the intensive care unit due to her intracranial hemorrhage which 24 hours later resulted in evacuation. She was placed on a ventilator and a tracheostomy was performed. Katie’s pre-operative diagnosis was left frontal hemorrhagic contusion and multiple skull fracture. She had a left frontal craniotomy with evacuation of the intracerebral hematoma. The dural tear and skull fracture were repaired. Additionally she suffered lacerations to the liver, face, left eyelid, and a right femur fracture.
Group Activity

Form groups of 4 people. Read the lyrics of the song “Unwell” and identify mental health conditions that are mentioned.

All day staring at the ceiling
Making friends with shadows on my wall
All night hearing voices telling me
That I should get some sleep
Because tomorrow might be good for something

Hold on
Feeling like I’m headed for a breakdown
And I don't know why
But I'm not crazy, I'm just a little unwell
I know right now you can't tell
But stay awhile and maybe then you’ll see
A different side of me
I'm not crazy, I'm just a little impaired
I know right now you don't care
But soon enough you're gonna think of me
And how I used to be, me

I'm talking to myself in public
Dodging glances on the train
And I know, I know they've all been talking about me
I can hear them whisper
And it makes me think there must be something wrong with me
Out of all the hours thinking
Somehow I've lost my mind

I've been talking in my sleep
Pretty soon they'll come to get me
Yeah, they're taking me away
Unit 5

A. Nutrition and Obesity

As healthcare workers, we must know the right kind of food for the patient’s diet. We should be able to know the differences between the different types of diets and food for our health teaching.

Main Course
A (choose one)
- two grilled burgers
- tuna fish pie
- a cheese pizza
- lentil soup
- egg noodles
- two slices of roast beef
- two fried eggs
- tofu curry
- a lamb kebab

+B (choose two)
- fried rice
- boiled potatoes
- salad
- baked beans in tomato sauce
- tinned tomatoes
- stir-fried mushrooms
- fried onion rings
- steamed broccoli

Dessert
- chocolate pudding
- a banana
- yoghurt
- a doughnut

Drink
- a bottle of cola
- a glass of orange juice
- a glass of wine
- a glass of milk

Exercise 5.1 Look at the list and answer the questions.

1. Find two good sources of protein ________________________________
2. Find two good sources of carbohydrate ________________________________
3. Find two dairy products ________________________________
4. Find seven ways of cooking food ________________________________
5. Which foods on the list are high on fat? ________________________________
6. Which foods contain high levels of vitamin C? ________________________________
7. Which foods are low in vitamins? ________________________________
8. Which items on the list are junk foods? ________________________________
9. Which food do you think is highest in calories? ________________________________

With your partner, use the list to create:

10. The most nutritious meal possible
11. the meal for a diabetic
12. the meal for somebody who needs to lose weight

10. ________________________________
11. ________________________________
12. ________________________________
Exercise 5.2 Complete the descriptions of vitamins, minerals and oils with the words below. Some words are used more than once.

<table>
<thead>
<tr>
<th>teeth</th>
<th>organs</th>
<th>enzymes</th>
<th>nervous system</th>
<th>cells</th>
</tr>
</thead>
<tbody>
<tr>
<td>brain</td>
<td>eyes</td>
<td>skin</td>
<td>immune system</td>
<td></td>
</tr>
<tr>
<td>blood</td>
<td>muscles</td>
<td>bones</td>
<td>cardiovascular</td>
<td>system</td>
</tr>
</tbody>
</table>

**Vitamin C** is needed to help the ___________ 1 repair itself when it is cut or damaged. It is found in fruit, especially citrus fruit like oranges and grapefruit.

The **B-vitamins** keeps the ___________ 2 healthy and help reduce stress. They are found in foods like wholegrain bread and cereals.

**Vitamin A** keeps the ___________ 3 healthy and is important for good vision. It is found in fatty foods like butter, cheese, whole milk and yoghurt.

**Vitamin D** is needed for healthy bones and ___________ 4 because it helps the body absorb calcium. Our body makes Vitamin D when our ___________ 5 is exposed to sunlight.

**Calcium** is needed for children’s ___________ 6 and teeth to grow. It is found in foods like milk, cheese and yoghurt.

**Iron** helps your ___________ 7 carry oxygen. If you do not get enough iron, you will be pale and tired and you may get anemia. Iron is found in red meats, especially liver.

**Zinc** makes your ___________ 8 stronger so that you can fight colds and infections. It is found in shellfish, nuts and seeds.

**Omega-3** is an essential fatty acid which helps your ___________ 9 function well. It is found in oily fish like mackerel, sardines, salmon and tuna.

**Protein** builds up, maintains and replaces the tissues in your body. Your ___________ 10, your ___________ 11, and your immune system are made up mostly of protein.

**Carbohydrates** are sugars which are broken down by ___________ 12 then stored in the ___________ 13 as a source of energy. Grain products such as rice, bread and pasta are sources of carbohydrate.

**Fats** fuel the body and help absorb some vitamins. They are also the building blocks of hormones, and they insulate nervous system tissue in the body. Unsaturated fats, found in oils and nuts, for example, are believed to protect the ___________ 14.

**Should / Shouldn’t**

- We use should/ shouldn’t to give advice and to say what would be correct
  
  You should give up smoking.
  
  Your blood sugar shouldn’t go over 240 mg/dL

- Should is weaker than must. That means the person you are giving an advice to doesn’t have to follow them.
  
  I should stop eating sweets – but I’m not going to!

- Here are some other ways of giving advice
  
  It would be a good idea to lose some weight.
  
  I’d see a nutritionist if I were you.
Exercise 5.3 Complete the sentences using should or shouldn’t + verb.
1. You ___________ some water before you go running.
2. I’m getting fat. I ___________ more exercise.
3. You ___________ breakfast – it wakes up the body and provides fuel for the day.
4. People with high blood pressure ___________ too much salt on their food.
5. You ___________ plenty of vitamin C in your diet.
6. People with diabetes ___________ large meals.
7. A person with an eating disorder help from psychologist.
8. Children ___________ too many sweets.

Giving an Advice

A close friend has written you an email asking for advice. She is worried about her eating habits.

Exercise 5.4 Complete the email with the words below.

and that’s terrible because I should be only 65 kilos! I’m really shocked. Every time I look in a mirror I ___________ , but that just makes me eat more. I am so busy these days, and I don’t have any time for exercise. Of course, I know fast food is ___________ , but every time I stop eating it I ___________ for a burger. I suppose I must be ___________ fast foods. Nothing ___________ in the same way.

I am trying hard to lose a kilo a week. Sometimes I ___________ , but it doesn’t work. I just feel hungry and then I give in and have spaghetti or steak – they’re better for me than burgers, aren’t they? I will stop eating fast foods, I promise – but don’t say I should do without cola, because I have ___________ on chocolate and even ___________ sugar from hot drinks completely. I thought, being a nurse, you should know about ___________ and diet, and you could give me some advice.

Love,
Hesta

Discuss with a partner what advice to give Hesta to help her lose weight successfully and in a healthy way. Think about these topics then write an email replying to Hesta.

exercise what not to eat
how much weight to lose when to eat
how quickly to lose weight what to drink
what to eat other good habits

Speaking Activity

Think of a problem and tell your partner about it. Ask his/her advice. Give each other pieces of advice and perform it in class.

e.g.
A

I have a doctor’s appointment tomorrow but we have an exam. What do you think I should do?

B

I think you should cancel or change the appointment.
B. Hygiene

To avoid infecting ourselves and the patients, we should always practice proper hygiene.

Exercise 5.5 Match each of these items of hygiene equipment to a picture.

___bin  
___bucket  
___cloth  
___mop  
___sink  
___clinical waste disposal bag  
___detergent  
___disposable gloves  
___paper towels  
___soap dispenser

Exercise 5.6 Complete the sentences with the words in the box.

<table>
<thead>
<tr>
<th>contamination</th>
<th>antimicrobial agent</th>
<th>pathogens</th>
<th>swab</th>
</tr>
</thead>
<tbody>
<tr>
<td>disinfectant</td>
<td>susceptible</td>
<td>resistant</td>
<td>spotless</td>
</tr>
</tbody>
</table>

1. An ________________ will kill microorganisms.
2. Use a sterile ________________ to get a sample from the back of the throat.
3. Our bodies have ways to kill ________________ such as viruses and bacteria.
4. The old, the young, and the very ill are most ________________ to hospital infection.
5. Staphylococcus is ________________ to most antibiotics.
6. There is a risk of ________________ from urine and blood.
7. Wash floors and door handles with ________________.
8. A home doesn’t have to be ________________, but it does have to be clean.

Exercise 5.7 Test your knowledge of hygiene by doing this quiz.

1. What is MRSA?  
   a. a virus  
   b. a bacterium  
   c. an antibiotic
2. How do you catch MRSA?  
   a. from dirty plates  
   b. poor hospital hygiene  
   c. drinking bad water
3. Which is not associated with bacteria?  
   a. wine making  
   b. yoghurt  
   c. common cold
4. Which breaks rules in an OR?  
   a. wearing mask  
   b. wearing your hair loose  
   c. wearing make-up
5. Where do staph bacteria live?  
   a. in noses  
   b. in soil  
   c. in toilets
6. How long should you wash your hands in hot water to be sure they are clean?  
   a. fifteen seconds  
   b. half a minute  
   c. one minute
Unit 6
A. Blood

Blood Groups

Can you work out the names of the women? Maddy’s blood can’t be given to other women. Holly could receive blood from Katie and Alex. Only Katie could donate blood to Freya. Four of the women could give blood to Maddy. Alex can’t be given blood by any of the others.

\[
\begin{align*}
A^- &= \_ \_ \_ \\
A^+ &= \_ \_ \_ \\
O^+ &= \_ \_ \_ \\
AB^+ &= \_ \_ \_ \\
AB^- &= \_ \_ \_ \\
\end{align*}
\]

Testing blood

Exercise 6.1 Complete the text using the words below.

Use a _______________ 1 to take some blood from a _______________ 2 in the patient’s arm. Put the blood into _______________ 3. Then, use a _______________ 4 to put a _______________ 5 of the blood onto a _______________ 6. Examine it under a _______________ 7. What do you see?

Describing blood cells

Identify each type of blood cell in the picture below.

\[
\begin{align*}
a & \quad \text{platelets} \\
b & \quad \text{white blood cells} \\
c & \quad \text{red blood cells} \\
\end{align*}
\]

Find three or more mistakes in this description.

There are many rectangular red blood cells moving freely in the plasma. The centers of the red blood cells are a light color and the cells are all the same size. There are white blood cells in the diagram. They are more regular in shape than the larger red blood cells. There are many platelets in this drop of blood. They are small, dark, oval-shaped bodies.
A blood test

Exercise 6.2 Complete the description of a Complete Blood Count (CBC) with the words below.

<table>
<thead>
<tr>
<th>infection</th>
<th>platelets</th>
<th>hemoglobin</th>
<th>clot</th>
</tr>
</thead>
<tbody>
<tr>
<td>oxygen</td>
<td>red blood cells</td>
<td>hemoglobin</td>
<td>white blood cells</td>
</tr>
</tbody>
</table>

A CBC measures the number of different cells that make up the blood. It looks at:

- _______________1 – these take _______________2 from the lungs to the body’s tissues, and take carbon dioxide away at the same time. The CBC also measures the amount of _______________3 (a protein in the cells that carries oxygen), and looks at the size and shape of the cells.
- _______________4 – these protect the body against _______________5.
- _______________6 – these make blood _______________7.

B. Coronary

The Heart

Exercise 6.3 Complete the descriptions with the words in the box.

<table>
<thead>
<tr>
<th>pump</th>
<th>leaves</th>
<th>valve</th>
<th>enters</th>
<th>artery</th>
<th>flows</th>
</tr>
</thead>
<tbody>
<tr>
<td>atrium</td>
<td>fills</td>
<td>aorta</td>
<td>opens</td>
<td>closing</td>
<td>beat</td>
</tr>
</tbody>
</table>

The heart is a muscle as big as your fist in the center of the chest. It is an efficient _______________1 that can get blood to the furthest cell in your body within sixty seconds. On its circular journey around the body, blood _______________2 the heart twice, once with oxygen and once without oxygen.

Blood without oxygen comes into the right side of the heart. It _______________3 the right atrium. Then the tricuspid valve _______________4 and the blood goes into the right ventricle. Then the pulmonary _______________5 opens the blood _______________6 through the pulmonary _______________7.

Blood carrying oxygen comes into the left side of the heart. The left _______________8 fills, the mitral valve opens and the blood _______________9 into the left ventricle. The aortic valve opens and the blood leaves through the _______________10.

When you listen to a heart _______________11 you hear ‘lub dub, lub dub’. This is the sound of the valves _______________12.

Zero and First Conditional

- We use the Zero Conditional to talk about what always happens in a particular situation. It is often used to talk about scientific facts.
  If **you heat** water to 100°C, **it boils**.
  When **you get** pregnant, **you put on** weight.

- The Present Simple tense is used in both parts of the sentence.
  What **happens** to the blood when **you take** aspirin?
• We use the First Conditional to talk about possible future actions or situations.
  
  If you remind me later, I'll come and help you.
  You won't get there on time if you don’t hurry.
  You won’t get there on time unless you hurry.

• We don’t use will / won’t after if / when / unless. We use the Present Simple.
  
  If you go through the swing doors, you’ll see the office on the left.

Exercise 6.3 Complete the sentences using the Zero or the First Conditional.

1. If you explain the problem to Mew, she _________________ (tell) you what to do.
2. When you have an anesthetic, it _________________ (stop) you from feeling pain.
3. If I have time this evening, I _________________ (help) you with your homework.
4. You ________________ (have) a fever if your temperature ________________ (be) over 37.5°C.
5. If a person’s brain ________________ (not get) oxygen, they ________________ (die).
6. If you ________________ (take) a sleeping pill before you go to bed, you ________________ (sleep) well tonight.

Speaking Activity
With a partner, write three scientific facts using the Zero Conditional, two true and one false. Read them to the class. They have to guess which one is false.

Reading

Blood Pattern Analysis

Even a tiny drop of blood at the scene of a violent crime can give important information to the police. Blood is there either because it has dripped out of a small wound, sprayed out from an artery, oozed out through a large wound, or flown off a weapon. Using blood pattern analysis, police can learn a lot about what happened from the shape of the blood drops.

Sometimes a murderer cleans the crime scene very carefully, and if detectives cannot see any blood they spray a chemical called Luminol across the scene. This makes it possible to see the blood in the dark. Luminol can show up very small drops of blood.

From the blood at the scene of a crime, police can learn about the person the blood came from. They can tell the person’s blood type and, because male and female blood cells are different, they can also work out if the blood comes from a man or a woman. Also, 80% of us are ‘secretors’, which means our blood type is contained in other bodily fluids. This can also help identify suspects.

In 1984 a man, Graham Backhouse, was found injured near his home with deep cuts across his face and chest. A neighbor lay dead nearby. Backhouse said the neighbor attacked him, and so he shot the neighbor to defend himself. But the shape of the blood drops showed that Backhouse was standing still when he was wounded, and there was also no blood from Backhouse on his gun or near the victim. Police were sure Backhouse shot the victim and then wounded himself. He was found guilty of murder.
Exercise 6.5 Read the article and decide if these sentences are true or false.

_____1. Blood from a cut artery drips out.
_____2. Blood pattern analysis looks at the shape of drops of blood.
_____3. Luminol tells you the blood type.
_____4. Male blood is different from female blood.
_____5. Graham Backhouse’s neighbors shot himself.

Find words in the text with these meanings.

1. (used about a thick liquid) to move slowly
   o_____________
2. a knife, gun, or other things used to hurt people
   w_____________
3. saliva, semen, and other liquids in the body
   b___________ _____________
4. people who the police believe committed a crime.
   s_____________
5. hurt by a weapon
   w_____________
6. responsible for a crime
   g_____________

Case Study

Three people have been seriously injured in a road accident, and brought to hospital. In one car was twelve-year-old Sally Cook and her 70-year-old grandfather William Cook. Sally has lost a lot of blood, and needs a transfusion. Her grandfather is unconscious and needs a bed on ICU and a ventilator to keep him alive.

Fred Ellis is 21 years old, and was driving the second vehicle. Police say Fred caused the accident. He has severe injuries, and he will need a ventilator and a bed on ICU.

Discuss the following problems in small groups.

1. Sally’s parents belong to a religious group which is against organ and blood donation. They do not want their daughter to have someone else’s blood. Should the hospital respect their wishes, or should they give her transfusion?

2. There is only one bed available on ICU. Who should have the bed, William Cook or Fred Ellis?

3. Have you ever been in a car accident? Have you ever seen one? Describe what happened.
Unit 7

A. Pain

Pain is a basic bodily sensation that is induced by a noxious stimulus, is received by naked nerve endings, is characterized by physical discomfort (as pricking, throbbing, or aching), and typically leads to evasive action.

Assessing Pain using the Pain Scale

Since pain is a symptom and can’t be seen by the healthcare professional, we can ask the patient to rate their pain from 0 to 10, 0 as the lowest and 10 the highest.

Describing Pain

To be able to know specifically what type of pain the patients are feeling, healthcare workers can ask the patients to describe it using layman’s terms. We can also use these descriptions if the patient can’t describe their pain. Although it is subjective, we can’t disregard what pain the patient is feeling and we should be sensitive to their needs.

Exercise 7.1 Match these words for types of pain with their descriptions.

1. a throbbing pain a. feels like it is eating you
2. a sharp pain b. travels fast along part of your body
3. a burning pain c. is steady and not too painful
4. a stabbing pain d. feels like a muscle is being squeezed
5. a shooting pain e. feels like something sharp is stuck into you
6. a dull ache f. comes and goes rhythmically
7. a gnawing pain g. feels like fire
8. a cramping pain h. is strong and sudden

Phrasal Verbs

Phrasal verbs are often used in informal spoken English. It is formed of a verb and a preposition. Both patients and healthcare professionals may use them in consultations. A phrasal verb may have several meanings according to context.

Exercise 7.2 Match the Phrasal Verbs and their meaning

1. bring on a. lessen, reduce
2. bring up b. happen in the end
3. carry on c. gain
4. come on d. commence, start
5. give up e. expectorate, vomit
6. put on f. cause, induce
7. turn out g. continue
8. turn up h. stop
9. cut down i. appear unexpectedly
10. carry out j. to complete a task
Exercise 7.3 Fill in the blanks with the correct phrasal verbs to complete the sentences.

1. When does the pain ______________?
2. Is there anything special that ______________ the pain?
3. When you cough, do you ______________ any phlegm?
4. I’ve ______________ a lot of weight last month or so.
5. The rash just ______________ out of nowhere.
6. She had all the tests and it ______________ to be cancer.
7. You should ______________ on sweets, it causes tooth decay.
8. My advice is to ______________ smoking.
9. We need to ______________ surgery.
10. ______________ taking the painkillers for another week.

Making comparisons

- We use comparatives to say how things are different.
  These painkillers are milder than those.
  Last night the pain was more severe than it was this morning.

- To make a comparative stronger, we often use much or a lot.
  You look much better today.

- The opposite of more is less.
  It’s much less sore than it was yesterday, thanks.

- We can use more and less with a noun to talk about quantity.
  They have more beds in the City Hospital.

- We use superlatives to compare something to all other things of the same type.
  This is the strongest painkiller available without a prescription.

- The opposite of most is the least.
  This is the least serious type of fracture.

- We can use most with a noun to talk about a large proportion of something.
  Most women choose to have pain relief when giving birth.

Exercise 7.4 Look at the information about these three painkillers. Complete the sentences, then write three more of your own.

<table>
<thead>
<tr>
<th>Painkiller</th>
<th>Effective</th>
<th>Cost</th>
<th>Side effects</th>
</tr>

</table>

1. Nuradine is much ______________ (effective) than Ibroxen.
2. Ibroxen is ______________ (cheaper) than Nuradeine.
3. Ibroxen has ______________ (side effects) than Nuradeine.
4. Nuradeine is ______________ (effective).
5. _______________________________________________________
6. _______________________________________________________
7. _______________________________________________________
B. Death and Dying

Talking about dying
Talking about death to a patient or a family member is a sensitive matter and needs to be handled professionally and respectfully as possible. Here are words about death that you can use.

Exercise 7.5 Match these words with a definition.

1. terminal  a. (of an accident or illness) that causes death
2. fatal  b. to become more and more weak or ill
3. go downhill  c. an examination of a body to find out how the person died
4. coma  d. the use of machines to keep a person alive
5. life-support  e. (of an illness) that cannot be cured, and causes death
6. pass away  f. a room in a hospital where dead bodies are taken and stored
7. mortuary  g. an unconscious state that a person cannot wake from
8. post-mortem  h. a polite word meaning ‘to die’

Complete the sentences using the words above.

1. This boy has serious head injuries. He has been in a ____________ for a week.
2. The patient stopped breathing, and is now on a ____________ machine.
3. We need a porter to take the body to the ____________.
4. I’m afraid your father ____________ in his sleep last night.
5. There was a ____________ accident outside the hospital – both drivers were killed.
6. The ____________ showed that the elderly lady died of a stroke.
7. After a bad fall, Mr. Deans ____________ very fast and died the following week.
8. This gentleman has ____________ cancer. With treatment, he may live another year.

The body after death
Exercise 7.6 What happens to the different parts of the body when we die? Complete the descriptions with the words in the box.

beating breathing slightly cools stops
rigid release ceases open enlarge

1. Brain activity ____________.
2. The skin ____________.
3. The eyelids ____________ slightly and the pupils ____________.
4. The pulse ____________.
5. The jaw relaxes and opens ____________.
6. ____________ stops.
7. The heart stops ____________.
8. The bowel and bladder ____________ their contents.
9. The limbs become ____________.
The Hope Children’s Hospice

A
The Hope Children’s Hospice provides free specialist care for children with life-limiting conditions who are not expected to live into adulthood. It cares for up to eight terminally-ill children at one time, and aims to care for them in the same way their families would care for them at home. When families prefer to do the caring themselves, a hospice carer will go to their home and help them.

B
Life-limiting conditions present many long term medical and emotional problems – not only for the child, but for parents and siblings too. So the hospice offers respite care – short stays for child alone or for the whole family together. At these times, parents hand over responsibilities to the staff and have a ‘holiday’. Short stays give terminally-ill children an opportunity to meet other with similar conditions.

C
Each child at the hospice has their own carer and their own care plan. A normal day might start with a jacuzzi bath followed by a massage from a complementary therapist. Some children go to school, while others play with hospice play specialists.

D
The hospice has a multi-sensory room. This is a special room which stimulates the children’s sense with lights, music, touch, and smell. It has touch-screen computers, video games, paddling pools, and space for wheelchair dancing. Children have music therapy and can record their own music, not only as a way to express their feelings, but to leave something for their family and friends to listen to in the years to come.

E
The hospice has a number of quiet rooms where we care for children during and after death. These are places where families and friends can say goodbye. Our support does not end with the death. We help not just grieving parents, but also siblings who are experiencing bereavement. We give everyone opportunities to discuss their fears about death and dying.

Answer the following questions about the article.

1. Do children have to stay at the hospice all the time? ____________________________
2. How does the hospice help the children’s families? ____________________________
3. How many children does each carer look after? ____________________________
4. What can children do in the multi-sensory room? ____________________________
5. How is music used at the hospice? ____________________________
6. How are the special quiet rooms used? ____________________________
Speaking Activity

Student A
Read these guidelines for preparing the body. Then exchange information with Student B. Ask questions, for example: What do you do with the mouth? What about washing? etc. Make notes as you listen to Student B.

<table>
<thead>
<tr>

</tr>
<tr>
<td>the room</td>
<td>Put chairs in the room for relatives to sit on. Put one or two boxes of tissue in the room. Clear away dirty linen, rubbish, and medical equipment that is no longer needed. Put on gentle music if appropriate.</td>
</tr>
</tbody>
</table>
A. Activities of Daily Living

Activities of daily living (ADL) refer to the things we do in the course of our daily routine – often they are almost automatic, i.e. we do them without having to think about them. It is only when we are disabled in some way or when we are in a situation which is abnormal, that conscious effort has to be made. All therapy must include consideration of the following factors for each individual patient. We can use the mnemonic OATSS which stands for Occupation, Activity, Task, Skill, and Sequencing.

- **Occupation** refers to a habitual, balanced state of being and the ways each individual person maintains his/her health throughout life.
- **Activity** refers to doing specific things and productive action. Activity is necessary for man’s survival and existence.
- **Task** is a component or one element of an activity.
- **Skill** is having the ability to do something well, i.e. having expertise. A skill can be acquired or learned.
- **Sequencing** is being able to link (join together) specific tasks in a logical order to complete an activity.

Personal Care is one of the ADLs that is under self-maintenance.

Exercise 8.1 Six components of personal care that must be considered for each patient. What tasks and processes are involved in doing this activities? What do you think is the role of the nurse in each of these?

<table>
<thead>
<tr>
<th>ADL</th>
<th>Patient’s tasks and processes</th>
<th>Nurse’s roles</th>
</tr>
</thead>
<tbody>
<tr>
<td>Toileting</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Bathing</td>
<td></td>
<td></td>
</tr>
<tr>
<td>eating / feeding</td>
<td></td>
<td></td>
</tr>
<tr>
<td>dressing / grooming</td>
<td></td>
<td></td>
</tr>
<tr>
<td>walking or moving around</td>
<td></td>
<td></td>
</tr>
<tr>
<td>transferring</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Can or Can’t /Could or Couldn’t

Can and could expresses ability or are used to make polite requests or commands. Can is used for present abilities while could is used for past abilities. Can’t is the short form of cannot and couldn’t is the short form of could not. ‘Can’ and ‘Could’ are modal verbs and are always followed by the infinitive (V1). It stays in the same form for all persons. To make questions, switch the modal verb and the subject.

e.g.

<table>
<thead>
<tr>
<th></th>
<th>positive</th>
<th>negative</th>
</tr>
</thead>
<tbody>
<tr>
<td>I / he / she / it / you / we / they</td>
<td>I can drink water.</td>
<td>They can’t eat solid food.</td>
</tr>
<tr>
<td>Present</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Past</td>
<td>He could walk alone.</td>
<td>We couldn’t save his life.</td>
</tr>
<tr>
<td></td>
<td>Yes / No questions</td>
<td>Short answers</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>I / he / she / it / you / we / they</td>
<td>Can you move your left shoulder?</td>
<td>Yes, I can.</td>
</tr>
<tr>
<td>Present</td>
<td></td>
<td>No, I can’t.</td>
</tr>
<tr>
<td>Past</td>
<td>Could she raise her right leg?</td>
<td>Yes, she could.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>No, she couldn’t.</td>
</tr>
</tbody>
</table>

You can only use can and could when you want to make a polite request.

e.g.  Could you take off your shirt, please?
      Can you please untie your shoes?

Exercise 8.2

Arrange these words into polite requests and questions and rewrite them on the lines.
e.g. Could you puff your cheeks, please?

1. you / open / mouth / your / please? / Could ________________________________
2. take / her / blood pressure? / Can / you ________________________________
3. roll / right? / to / Could / please / you / your ________________________________
4. raise / arm? / Can / you / his ________________________________
5. bend / knees?/ Could / you / please / your ________________________________

Exercise 8.3

The table below shows what Sally was able to do before and after her heart surgery. Write sentences using Can or Could and the information from the table.
e.g. Sally couldn’t exercise before her surgery, but she can exercise now.

<table>
<thead>
<tr>
<th>Activities</th>
<th>SN</th>
<th>RN</th>
</tr>
</thead>
<tbody>
<tr>
<td>eat junk food</td>
<td>☀️</td>

</tr>
<tr>
<td>climb the stairs</td>
<td>☺️</td>
<td>☀️</td>
</tr>
<tr>
<td>smoke</td>
<td>☀️</td>
<td>☀️</td>
</tr>
<tr>
<td>stand for long hours</td>
<td>☺️</td>
<td>☀️</td>
</tr>
<tr>
<td>drink alcohol</td>
<td>☺️</td>
<td>☀️</td>
</tr>
</tbody>
</table>
B. Pressure Areas and Pressure Sores

The Norton Scale of Assessment is used to calculate the risk of pressure sores by recognizing a potential risk because sores can be prevented. These pressure sores start as a redness of the skin on the pressure points (or pressure areas) on the body – areas where there is not much fat or ‘padding’ over a bony prominence. The redness can easily become a sore when the skin breaks down. Some patients are more are risk than others and for this reason Norton Scale is used for assessment. Very thin people and those that are in poor nutritional state are at risk. Very heavy (obese) people are at risk because they are less likely to be mobile, and unconscious and paralyzed patients are at risk because they are unable to move. Incontinent patients are at risk because urine and feces ‘burn’ fragile skin tissue and the friction of wet skin surfaces on the bed and chair causes redness and damage to the skin.

How to use the Norton Scale
By adding the numbers from each column for the individual patient, the risk factor can be ascertained:

When the total score is 20, there is no risk at all.
When the total score is 15-19, there is low risk.
When the total score is 11-14, there is medium risk.
When the total score is 5-10, there is high risk.

Exercise 8.4 Check the body parts that may be considered pressure points in an unconscious or bedfast patient.
- the shoulder blades
- the elbows
- the belly
- the buttocks
- the hips
- the sacrum
- the chest
- the heels
- the back of the knees
- the outer ankles
- the neck
- the hands
- the thighs

Exercise 8.5 The following statements are either True or False. Write T or F and correct the false statements
1. Patients are at risk of getting pressure sore have a high score on the Norton Scale.
2. All patients in hospital are at risk of getting pressure sores.
3. Patients who are incontinent of both urine and feces are at high risk
4. The first sign of a pressure area is a small red area or an abrasion over a bony surface.
5. Fat people are not at risk because they have ‘protective padding’.
6. Pressure areas can be prevented by keeping the skin clean and dry and by encouraging the patient to move and change his position or by turning unconscious or paralyzed patients every 2 hours.
7. Ring pads, cushions and pillows can be used to keep the affected area off the surface of the bed.
8. Special mattresses, called ripple mattresses, are available for immobile or unconscious patients. They are connected to a motor which circulates air inside the mattresses and increases the blood circulation.

Speaking Activity
Group into 4 to 5 people. Think of an admitted patient that you had and determine their risk factor for pressure sores. Share your experience with your group. Whoever had a patient with the highest score in will share it with the class.
Describing Appearance

**Appearance** is the way someone or something looks like.

In describing how people look we use adjectives. Start with the hair followed by the face. You can describe the hair by telling the length, texture, color respectively. Words that can be used to describe hair are short, long, medium length, straight, curly, wavy, dark, gray, red, brown and blonde.

When describing the face, you can start with the shape of the face, then the color of the eyes, size of the ears, nose, and lips. Words to describe the face are round, long, heart-shaped, square, chubby; describe the color of the eyes like black, brown, blue; size for the ears and nose for example small, medium, big or pointy; and thin or thick lips. For men, describe if they have facial hair like moustache and beard.

You can also describe the color of the skin like fair, tan, or dark.

For example:

He has got short, curly, gray hair.
He has got a round face with black eyes, big ears, big nose, a moustache and a beard.
He has got a tan skin.

She has got long, wavy, red hair.
She has got a round face with black eyes, small nose, and thin lips.
She has got a light skin.

Exercise 8.6

A. Describe the people in the pictures.

1.                                                        2.                                                        3.
She has got _______________                           He has got ___________________                       She has got _____________
_________________________                           __________________________                    __________________
_________________________                           __________________________                    __________________

GAME: The Doctor is In
(The teacher should prepare the printable pages 46-48 beforehand)

1. Form groups of 3, 1 will be doctor, 1 will be nurse and 1 will be patient.
2. The doctors and the patients will stand on opposite sides of the room.
3. The patients will open an envelope containing information of people.
4. The patients will describe the picture to the nurses then the nurses will tell the doctors of the patient’s appearance without looking at the paper.
5. Then, the doctors will look for the patient’s chief complaint, diagnosis and treatment and will inform the nurse. The nurse will go back to the patient and tell them the information. The patient will use glue to paste the pieces of paper on the paper with the correct sequence.
6. The group who finishes first with the correct answers will be the winner.
Unit 9

A. Surgery

When you decide to be a scrub nurse or a circulating nurse in the OR, you have to be familiar with the things that the surgeon will use. Often times, nurses have to anticipate the instrument that the surgeon will need and have it ready before he even asks for it. Nurses should also be aware of the number of the instruments at all times to avoid causing unnecessary injury to the patient, and at the same time maintaining their sterility.

Exercise 9.1 Match each word with its description. How many of the items can you find in the pictures?

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>drapes</td>
<td>1. a tool with a sharp blade for cutting</td>
</tr>
<tr>
<td>forceps</td>
<td>2. a scissor-like tool for gripping tissue</td>
</tr>
<tr>
<td>an implant</td>
<td>3. tubes attached to a pump for removing blood or other fluids from the surgical site</td>
</tr>
<tr>
<td>a swab</td>
<td>4. a device or artificial part that is inserted into the body, to replace or assist a defective part</td>
</tr>
<tr>
<td>retractor</td>
<td>5. stitches that are inserted to close a wound</td>
</tr>
<tr>
<td>suction</td>
<td>6. sterile covers for the parts of the patient’s body not involved in the operation</td>
</tr>
<tr>
<td>sutures</td>
<td>7. small piece of wire that are pushed with a machine into each side of a wound to close it</td>
</tr>
<tr>
<td>gown</td>
<td>8. tools that hold organs out of the way to allow access to the surgical site</td>
</tr>
<tr>
<td>staples</td>
<td>9. a loose sterile piece of clothing worn by people in the operating theatre</td>
</tr>
<tr>
<td>scalpel</td>
<td>10. a piece of material, such as cotton, that is used to absorb blood during surgery</td>
</tr>
</tbody>
</table>

Preparing the patient for surgery

If you were having abdominal surgery, how much would the following things worry you? Mark them between 0 (it wouldn’t worry me at all) and 5 (it would worry me a lot). Compare your answers with your partner.

- dying during surgery ___
- having the wrong operation done ___
- MRSA ___
- pain after the operation ___
- pain during the operation ___
- scarring ___
Future forms

will + infinitive
We use will / won’t to talk about the future in general, and to make predictions, offers, or promises. The short form ‘ll is used in conversations. The negative form is will not, or more commonly, won’t.

The scar will fade over the next few months.
You won’t be able to drive after the operation.

be going to + infinitive
We use be going to to talk about intentions, schedules, or plans. A course of action has already been decided.

I am going to give you some pain relief.
Is the doctor going to see me today?

should + infinitive
We can use should to mean ‘probably’ if it refers to an outcome with less certainty than will.

The scar should fade over the next few months.

may/might + infinitive
May and might have almost no difference in meaning. They are both used to talk about possibility.

We may / might have to change your prescription.

Note: We can’t use modal verbs after these forms. We use be able to instead of can and have to instead of must. NOT You won’t can’t talk after the operation.

Exercise 9.2 Complete the sentences with the verbs below. Some of the verbs are used more than once.

<table>
<thead>
<tr>
<th>be going to</th>
<th>ask</th>
<th>give</th>
<th>may</th>
<th>be</th>
<th>make</th>
<th>might</th>
</tr>
</thead>
<tbody>
<tr>
<td>let</td>
<td>wake up</td>
<td>will/'ll/won’t</td>
<td>leave</td>
<td>should</td>
<td>feel</td>
<td>be able to</td>
</tr>
</tbody>
</table>

a. I’m worried that the anesthetic won’t be strong enough, and I __________ in pain, but ________ speak.

b. If you like, I ____________ the anaesthetist to explain exactly what he does.

c. It ___________ quite a neat little scar actually.

d. In a moment I ____________ you a pre-med.

e. How ____________ I ____________ when I ____________?

f. You ____________ a little sick or you ____________ really hungry.

Exercise 9.3 Work in pairs and discuss the questions.

1. Which sentences in 9.2 predict or imagine the future?
2. Which sentence states someone’s intention?
3. Which sentence includes an offer or promise to do something?
4. Which modal verbs are used to mean ‘possibly’?
5. Which modal verb is used to mean ‘probably, if everything goes well’?
6. In which sentences is a present tense used to talk about the future?
B. Post-operative Complications

Different types of surgery have different types of complications. Generally though, patients face the following risks. We should be aware of the signs and symptoms of these complications so we can detect them early and better prevent them for happening.

Exercise 9.4 Match the common complications 1-6 with the information about them A-F.

A. Atelectasis
B. Deep-vein thrombosis
C. Low urine output
D. Post-operative pain
E. Post-operative wound infection
F. Pyrexia

1. ____________________ treated by antibiotics.
2. ____________________ (fever) a symptom of infection either at the surgical site, in the lungs (for example, pulmonary edema) or in the urinary tract.
3. ____________________ the standard treatment is by intramuscular opioid (usually Morphine).
4. ____________________ after surgery, there is a tendency for patients to retain fluid, and urinary output is a measure of the performance of the liver and the kidneys.
5. ____________________ this occurs when a blood clot develops, usually in the lower leg. It can cause a fatal pulmonary embolism. Early signs of the clot formation include hypertension and cold feet. Heparin is commonly used as a prophylactic (a course of action to prevent a disease)
6. ____________________ (collapsed lung) caused by blocked air passages. One of the first signs is abnormally high heart rate (tachycardia) and abnormally rapid breathing (tachypnea). Mechanical ventilation is provided to help patients breathe.

Suffixes

Match the meanings 1-6 with the group of words a-f.

<table>
<thead>
<tr>
<th>a. cutting into</th>
<th>b. making a puncture in order to drain off fluid or air</th>
<th>c. making a passage from an organ to the skin</th>
<th>d. optical examination</th>
<th>e. surgical removal</th>
<th>f. surgically changing the shape</th>
</tr>
</thead>
<tbody>

Unit 10

A. Caring for the Elderly

Exercise 10.1 Discuss the questions with a partner

1. Would you like to live in a care home when you are old? Why / Why not?
2. Think of an elderly person you know well and how ageing has affected them. Think about the answers to these questions. Then talk to your partner about the person.
   a. What daily tasks does he / she need help with? ___________________________________________
   b. How does he / she keep physically fit? _________________________________________________
   c. How happy is he / she? _____________________________________________________________
   d. How healthy is he / she? ___________________________________________________________
   e. What worries him / her? ___________________________________________________________

3. Discuss what special difficulties are faced by elderly patients and the staff who are caring for them. Use the words below to help you, and write sentences. e.g. They may have more side effects from drugs.

<table>
<thead>
<tr>
<th>medication</th>
<th>getting around</th>
<th>daily tasks</th>
<th>food</th>
</tr>
</thead>
<tbody>
<tr>
<td>recovery</td>
<td>mind</td>
<td>home</td>
<td>complications</td>

</table>

Alzheimer’s disease

Exercise 10.2 Decide if each symptom is more connected with movement (M), thought (T), or behavior (B). Then compare your ideas with your partner.

Alzheimer’s disease damages the brain, destroying memory and reason. People with Alzheimer’s disease suffer confusion and loss of cognitive function. They need more and more nursing care as they become progressively more helpless, and finally die. The illness has three stages:

early stage
- forgetting recent conversations or events ______
- minor changes in abilities and behavior ______
- repetition ______

middle stage
- needing some help with ADLs ______
- wandering ______
- loss of interest in other people ______
- unusual behavior ______
- shuffling gait ______

later stage
- needing constant help with ADLs ______
- forgetting names ______
- complete loss of memory ______
- inability to recognize people, objects or places ______
- getting easily upset or aggressive ______
- confusing night and day ______
- confinement to bed or a wheelchair ______
- difficulty in swallowing ______
- loss of speech ______
Will

We use will:

- to talk about future facts.
  In twenty years time, there will be more old people and fewer young people.

- to make predictions and express hopes about the future. We often use words such as I think, I hope, and probably when we do this.
  I think I’ll die when I’m 90!
  I don’t think I’ll play sport when I’m 80.
  I hope I won’t live in a care home.
  With family around, you’ll probably have a long and healthy old age.

- when we decide what to do, have, etc.
  Tea or coffee? Er ... I’ll have coffee, please.

- to make offers, requests, and promises. We can also use Shall I...? for offers.
  I’ll get you a drink.
  Shall I get you something to eat?
  Will you do me a favor?
  I won’t be back late, so don’t worry.

Exercise 10.3 Complete the sentences with the words below. Then decide if each one is a future fact (F), a prediction (P), or a decision you’re making (D).

| ’ll be able | ’ll have | ’ll probably
| ‘ll sleep | Shall I | will open |

1. The new hospital ____________ in 2010. _______
2. I don’t think you ____________ tonight if you have a nap now. _______
3. ____________ go out tonight? Er ... no, I think I’ll stay at home. _______
4. You ____________ to go home a week after your operation. _______
5. I ____________ chicken curry with rice, please. _______
6. I’m working tonight, so I ____________ be tired tomorrow. _______

Exercise 10.4 Complete this dialogue of offers and requests. Use ‘ll, will, or won’t and add one of the verbs below.

| fall | pass | stand | do | see |

A: ____________ you ____________ me my glasses? Then I ____________ be able to ____________ the television.
B: Here you are.
A: Thanks. Oh and ____________ you ____________ another favor?
B: What now?
A: ____________ you help me ____________ up? I want to switch it on.
B: You ____________ probably ____________ over. I ____________ do it.
A: Thank you. I ____________ trouble you again.
B. Problems and aids

Exercise 10.5 Work in pairs. Match the adjectives with the cases. Say the adjectives as you do the exercises.

An elderly person who ...

1. cannot leave her bed a. frail
2. often wets himself b. immobile
3. breaks a bone easily c. bedridden
4. can’t hear very well d. confused
5. cannot move around freely e. independent
6. often can’t remember things f. forgetful
7. wears his pyjamas in the street g. incontinent
8. can’t see very well h. shortsighted
9. likes to be free i. deaf

Exercise 10.6 Match each vocabulary item with a picture.

___1. hearing aid
___2. walking stick
___3. glasses
___4. pressure bed
___5. incontinence pad
___6. bath lift
___7. power chair
___8. helping hand
___9. false teeth
___10. artificial hip
___11. walking frame
___12. commode

Acknowledgment

I would like to express my utmost gratitude to our Director, Asst. Prof. Dr. Pornchulee Achava-Amrung, for giving me this wonderful opportunity to write this book and for allowing me to teach the students from the Faculty of Nursing of Naresuan University. I am grateful for all the trust and confidence that you have shown me.
